Professional Summary

Senior executive with 18+ years of experience at the intersection of investment banking, management consulting, and quantitative transformation, now pivoted to academic research. Currently a PhD Fellow at the University of Copenhagen (Department of Mathematical Sciences, Insurance and Economics section) working on quantum and quantum-inspired solvers for cardinality-constrained mean–variance portfolio optimization (the QPO research project). Combines deep industry insight in capital markets and electronic trading with hands-on operation of multi-cluster HPC workflows (LUMI-G, DeiC GenomeDK) and the D-Wave Ocean quantum-annealing toolchain. Track record in leading high-performing teams and delivering analytical excellence through strategic foresight and data-driven execution.

Core Competencies

- Quantitative research and financial data modeling
- Transformation and strategy programs within financial services
- Capital and liquidity management, market microstructure, and electronic trading
- Digital infrastructure and operational excellence
- M&A (tech due diligence and post-merger technology integration)
- Data & analytics enablement and governance
- Project management (PMO) and change leadership

Professional Experience

PhD Fellow – Quantum Finance

University of Copenhagen, Department of Mathematical Sciences | Copenhagen, Denmark 2026 – 2029

- Research in quantum and quantum-inspired solvers for cardinality-constrained mean–variance portfolio optimization (the QPO research project): a four-solver unified-benchmark codebase (Simulated Annealing, Path-Integral Simulated Quantum Annealing, Path-Integral Monte Carlo, discrete Simulated Bifurcation) with 190+ unit tests.
- Active operator of multi-cluster HPC workflows: LUMI-G (CSC, Finland) and DeiC GenomeDK. Daily use of the D-Wave Ocean quantum-annealing toolchain.
- Sibling research line on Quantum Anomaly Detection (QAD): projected quantum kernels, trainable kernel-target alignment, warm-start QAOA on financial-fraud datasets; 547+ unit tests; one paper in preparation.
- Member of UCPH Math, Insurance and Economics section.

Head of BearingPoint Denmark

BearingPoint | Copenhagen, Denmark

Jan 2023 – Jun 2025

- Established and led the Danish branch from inception to multi-million DKK revenue.
- Full operational, financial, and commercial responsibility.
- Designed and executed data-driven transformation programs for European banking and insurance clients, including tech due diligence and post-merger integration initiatives.

External Lecturer – Transformation & Entrepreneurship

ESADE Business School | Barcelona, Spain

Jan 2019 – Sep 2023

- Lectured MBA and Executive MBA students on digital transformation in financial services.
- Integrated data-driven entrepreneurship, business-case evaluation, and operational excellence in academic teaching.

Founder & Senior Business Advisor

Somersault.one | Copenhagen, Denmark

Oct 2017 – present

- Advised financial institutions on quantitative transformation and efficiency programs.
- Built and implemented **data models for the banking industry** to enhance decision-making and performance tracking.

Associate Partner – Data Analytics & Digital Strategy

Bain & Company (former QVARTZ) | Copenhagen, Denmark

Nov 2017 – Jun 2019

- Delivered digital and data-analytics strategies for leading Nordic financial institutions.
- Designed governance and architecture for advanced analytics platforms supporting C-level decision-making.

Global Head of Electronic Trading, Director

Nordea Markets | Copenhagen, Denmark

Feb 2016 – Oct 2017

- Led digital transformation of Fixed Income & FX flow trading, including algorithmic trading and STP infrastructure.
- Managed team of quants and traders responsible for interbank connectivity and market-risk optimization.

Deputy Head of Fixed Income & REPO Trading

Nordea Markets | Copenhagen, Denmark

Dec 2013 – Feb 2016

- Oversaw €65 m turnover and 12-person desk across Nordic markets.
- Co-led Nordea's *Optimization of Balance Sheet* program focusing on capital and liquidity efficiency.

Executive Business Advisor to Head of Trading

Nordea Markets | Copenhagen, Denmark

Jan 2010 – Dec 2013

- Strategic advisor to the Managing Director on digital trading and performance management.
- Led early initiatives on algorithmic trading and process automation.

Strategy Consultant

Bain & Company (former Quartz Strategy Consultants) | Copenhagen, Denmark

Jan 2008 – Jan 2010

- Conducted commercial due diligence and turnaround strategy for PE-backed and distressed firms.

Founder – TBM Financial Solutions

Copenhagen, Denmark

Jul 2006 – Jan 2008

- Developed and commercialized proprietary **equity trading models** based on multi-indicator technical strategies.

Fixed Income Analyst

Nordea Investment Management | Copenhagen, Denmark

Sep 2004 – Jul 2006

- Supported portfolio managers through quantitative risk and performance analytics for global high-yield portfolios.

Education

PhD Fellow, Quantum Finance, University of Copenhagen – Department of Mathematical Sciences, 2026 – 2029 (in progress)

INSEAD – Executive Board Education, 2023

ESADE Business School – MBA, 2015 – 2017

University of Copenhagen – MSc Mathematical Economics (cand.scient.oecon), 2009

University of Copenhagen – BSc Mathematical Economics, 2005

Executive & Global Learning

- Real Estate Investment | Columbia Business School (US)
- Leading a Global Business | Georgetown McDonough (US)
- Digital Management of Marketing & Sales | ESADE (Spain)
- Doing Business in China & Asia | Shanghai Jiao Tong University (China)
- Organizational Change | FGV EBAPE (Brazil)

Research & Technical Interests

- Stochastic processes and quantum-enhanced financial modeling
- Computational finance, numerical simulation, and data-driven optimization
- Python, Git, Bash, and applied machine-learning workflows
- Quantitative data modeling and large-scale analytics architecture

Languages & Interests

- **Languages:** Danish (native), English (fluent)
- **Interests:** Cycling (road & gravel), skiing, Italian culture & cuisine
